1. Executive Summary

BitBonus a BTC Rewards Token (BBR) is a groundbreaking cryptocurrency designed to incentivize and reward holders with Bitcoin based on trading volume. With a unique mechanism, BitBonus redistributes 4% of every buy and sell transaction to loyal holders with 2 500 000 tokens in the form of Bitcoin, providing an innovative way to earn passive income in the crypto market. This whitepaper outlines the features, benefits, and mechanics of BitBonus, offering insight into its potential to transform the landscape of crypto rewards.

2. Market Overview

The cryptocurrency market has seen exponential growth over the past decade, with Bitcoin at the forefront as the premier digital asset. However, the volatility and complexity of the market can be daunting for new investors. BitBonus aims to reduce these barriers to entry by rewarding participants with Bitcoin, thereby enhancing their engagement with the broader cryptocurrency ecosystem.

3. Introduction to BitBonus

BitBonus is a BEP-20 token built on the Binance Smart Chain (BSC), chosen for its low transaction fees, high throughput, and robust community support. The project's core mission is to democratize access to Bitcoin rewards, making it easier for individuals to gain exposure to Bitcoin without directly purchasing or mining the digital asset.

4. Tokenomics

4.1 Supply Details

- Total Supply: 25 000 000 000 BitBonus (BBR) tokens
- Allocation:
 - 50% (12 500 000 000) Presale
 - 18% (4 500 000 000) Liquidity (locked 1 year)
 - 15% (3 750 000 000) Marketing/CEX
 - 10% (2 500 000 000) Development
 - 5% (1 250 000 000) Community/airdrops/win contests
 - 2% (500 000 000) Buy back and burn

4.2 Tax Structure

A 4% tax is levied on all buy and sell transactions, which is allocated as follows:

- 2% to Bitcoin Rewards Pool: Distributed to token holders based on their holdings and the volume of trades.
- 2% to Marketing/CEX: To sustain the project's growth and expansion.

5. Rewards Distribution Mechanism

BitBonus employs a dynamic rewards system where Bitcoin rewards are distributed to token holders based on the volume of BitBonus traded. The distribution occurs automatically and is proportional to the holder's share of the total token supply.

6. Security Measures

- **Smart Contract Audits:** Conducted by reputable firms to ensure code integrity and security.
- **Transparency:** Regular updates and open communication channels with the community.

7. Risks and Challenges

- **Market Volatility:** The inherent volatility of cryptocurrency markets may affect the value of rewards.
- **Regulatory Changes:** Shifts in regulatory landscapes across jurisdictions could impact operations.
- **Smart Contract Vulnerabilities:** Despite audits, potential vulnerabilities could arise.

8. Conclusion

BitBonus represents a novel approach to engaging with the cryptocurrency market, offering users a pathway to Bitcoin rewards through tokenomics designed for sustainability and growth. By aligning incentives between token holders and the broader ecosystem, BitBonus aims to foster a vibrant community and contribute to the mass adoption of cryptocurrencies.

This whitepaper is a foundational document intended to guide the development and growth of the BitBonus project. It will be updated and revised as the project evolves in response to community feedback and market developments.
